

REMARKS

A submission is provided herein requesting continued examination pursuant to 37 C.F.R. §1.114 in conjunction with a petition under 37 C.F.R. §1.313 requesting consideration of a request for continued examination in compliance with section 1.114. The present submission is being provided pursuant to C.F.R. §1.114(c) in order to amend the drawings and the written description. Claims 1-30 remain in the application for consideration in the same form as previously allowed.

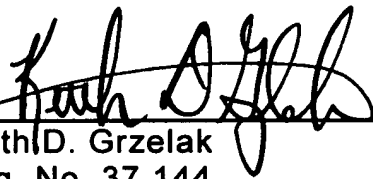

Particularly, a substitute drawing sheet is submitted herewith. The directional arrow heads for servo helper assembly 26 in Fig. 1 were shown in the wrong direction and are inconsistent with the direction indicated in the written description as well as the direction indicated by servo pick assembly 24, as well as the direction indicated in U.S. Patent 6,843,156, as incorporated by reference. No new matter is added by this correction to Figure 1, and acceptance of the substitute drawing is requested.

The specification has been amended to remove a blank line and insert the proper patent number; namely, U.S. Patent 6,843,156 into the written description of paragraph 21.

The present claims are believed to remain allowable over the prior art of record. Accordingly, action to that end is respectfully requested.

Respectfully submitted,

Dated: 2/22/06
